Visit www.wildfirepartners.org and fill out the on-line application. An acceptance email will be sent indicating acceptance, wait-list or rejected status.

Once accepted, the homeowner will be required to sign a waiver and pay a $100 assessment fee.

Once the payment and waiver have been processed and received, a Phone Advisor will reach out to schedule an initial assessment.

During the initial assessment, a Mitigation Specialist will walk the property and collect data to create a report on what mitigation work needs to be completed.

A report will be generated consisting of all mitigation work. This will be sent to the homeowner along with resources to assist in completing any home retrofit work or forestry contracting.

The program will pay an award of 50% (up to $2500 total), of the approved forestry contract work after submission of an approved bid and completion of the work.

Once all items noted as "required" on the report are completed, the homeowner can schedule a Mitigation Specialist to come back out to complete a Final Inspection. Upon passing this Final Inspection, and completing the Homeowner Reporting form, a Wildfire Partners yard sign and certificate will be awarded to the homeowner.
